Establishment of New Non-Academic Position Policy

Policy Manager: Human Resources

POLICY STATEMENT

To set forth a procedure for establishing new non-academic positions to support the mission, vision & values of Augusta University.

The position classification system in use at Augusta University provides the basis for nonacademic personnel compensation.

The system is designed to group positions with substantially similar duties and responsibilities, performed under similar working conditions, and requiring similar qualifications. Such groups are referred to as job classifications. Each job classification is identified by an official job title. Official job titles are used to distinguish one job classification from all others in the system. Use of working titles (titles used to identify positions more specifically and/or informally) is not restricted, provided the working title does not misrepresent the authority or function of the position, and provided the working title is not an official job title identifying a classification other than the one to which the position is assigned.

All new positions will be classified by the Human Resources Division before inclusion into the institutional budget, and prior to any recruiting actions.
